TOTAL			

NOTE: The District cannot accept responsibility for sizes and/or the viability of plant materials as stated by the nursery. All planting material requires commitment to assure survival. Putting plants under stress (i.e. lack of water, planting too deep or too shallow, or a delay in planting) will weaken the plants and lessen survival rates. Do not plant larger trees too close to buildings, sidewalks, driveways or utilities. It is your responsibility to learn proper planting techniques and to select appropriate planting sites. The District cannot be responsible for replacing stock that do not survive.

DESCRIPTIONS

Although these plants are for conservation purposes only and shall not be used as ornamentals or for landscaping (SWCD Act), landowners living in urban areas are encouraged to plant these species as they can provide wildlife habitats, shade, windbreaks, or erosion control.

TREES & SHRUBS

Ohio Buckeye: Low –branched small to medium sized deciduous tree. Grows in average, medium well-drained soils in full sun to part shade. Palmate leaves turn bright green to dark green in summer to yellow in fall. Will produce and drop buckeyes. H:20-40’ W:20-40’ Full sun.

Autumn Blaze Maple: Rapid growing pyramidal shaped tree. Dazzling red fall color. Adaptable to most soils. Cross between red & silver. H: 50-60’ W: 30-40’ Full sun.

Sienna Glen Maple: Rapid growing oval shaped tree. Turns burgundy red with tinges of burnt orange in fall, very hardy and adaptable to most soils, less susceptible to frost cracking than other maples. Seedless. H: 50-60’ W: 30-40’ Full sun.

White Oak: Slow growing rounded deciduous. Good fall colors, open branching habit. Illinois official state tree.
H: 60-90’ W: 40-60’ Full sun.

Red Oak: Rapid growing spreading deciduous. Turns red-orange in fall, red new growth. Suitable for streets and large yards. H:75-90’ W: 40-60’ Full sun.

Concolor Fir: Narrow conical conifer that grows best in rich, medium moisture, slightly acidic, sandy, well-drained soils in full sun to part shade. Soft, flattened, pale blue-green needles. H: 40-70’ W: 20-30’

Eastern White Pine: Grows in average, medium, well-drained soil in full sun. Prefers full sun, fertile soils and cool, humid climates. Rapid growing, long-lived, needled evergreen. H:50-80’ W:20-40’

Colorado Blue Spruce: Grows in average, acidic, medium moisture, well-drained soils in full sun. Tolerates some light shade. Medium to large, narrow, pyramidal conifer. H:30-60’ W:10-20’

Norway Spruce: Large, evergreen coniferous tree. Prized for blue-green needles color and excellent landscape form. H:50-125’ W:20-45’

Bailey’s Red Osier Dogwood: Prefers organically rich, medium to wet soils. Leaves change from green to red/orange and eventually purple in autumn. Stems turn bright red in winter. Tiny, fragrant, white flowers in late spring. Fruit ripens in summer and is attractive to birds. H: 5-6’ W: 5-6’ Full sun to partial shade.

Lilac– Common Purple: Medium growing vase-like deciduous broadleaf shrub. Fragrant lilac flowers in late spring.
H: 6-12’ W: 6-12’ Full sun.
